SUSTAINABILITY AND COMFORT IN ONE PV SYSTEM

Combine energy-saving solutions with a healthy indoor environment and comfort in daylight, in one PV system. Integrate a FAKRO skylight into the system of your choice. We have developed a bracket that provides a seamless join with the GSE IN-ROOF PV mounting system. You can decide where you want your FAKRO skylights to fit into the PV combination.

New builds and renovations
The FAKRO PV solution can be installed on both new builds and renovation projects. The system's measurements have been adapted to typical PV panel sizes, so it will fit into the whole roof system seamlessly. We can also provide bespoke solutions if you have special requirements.

## INTEGRATION OF SKYLIGHT INTO GSE IN-ROOF SYSTEM

FAKRO®

GSE Integration

CHARACTERISTICS OF THE GSE IN-ROOF SYSTEM

Seamless connection
Experience a seamless and watertight connection to GSE IN-ROOF PV mounting system. Personalise the connection with the RAL colour of your choice. Replace any PV panel with a skylight.
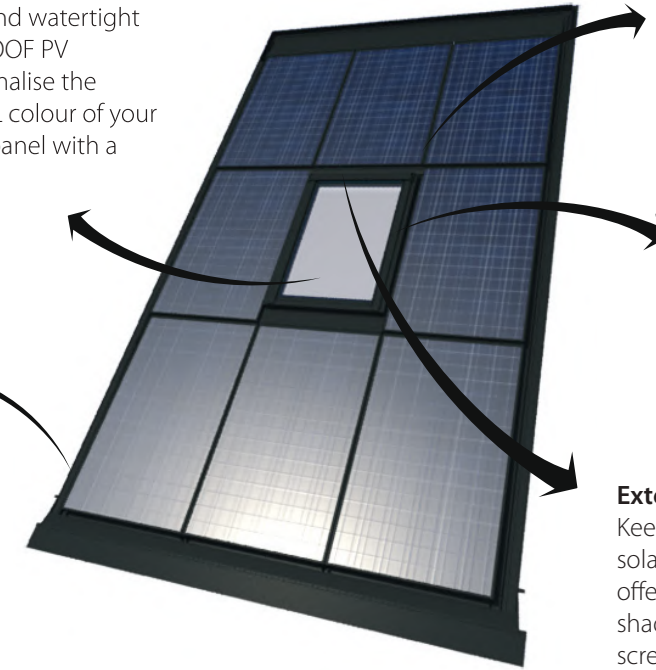

Easy integration
The system can be easily integrated into an existing situation, both before and after installation. Suitable for standard skylight sizes.

Thermal insulation
The Thermo flashing provides optimal thermal insulation, which makes it extremely suitable for passive houses.

Modular construction

External solar shading
Keep the heat out with external solar shading FAKRO skylights offer a full range of external solar shading, including solar-controlled screens and blinds.
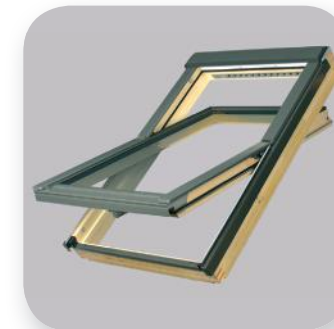

The model PV system is based on standard skylight measurements.

SKYLIGHT INTEGRATION: IN 3 SIMPLE STEPS

1.
Choose your PV configuration.
Decide how you would like to adapt GSE PV mounting system on your roof.

2.
Choose your skylight.
FAKRO has a wide range of skylights available for you to choose.

3.
Optimal PV and skylight integration.
Once you have chosen an existing PV system design or a bespoke PV system, we will get to work so you get a skylight and flashing that fit your PV roof perfectly. The solution is easy to install.

Ours advisors are here to help you with each step of your project.
