

Roto roof window integration in the GSE solar panel assembly system

GSE
Intégration

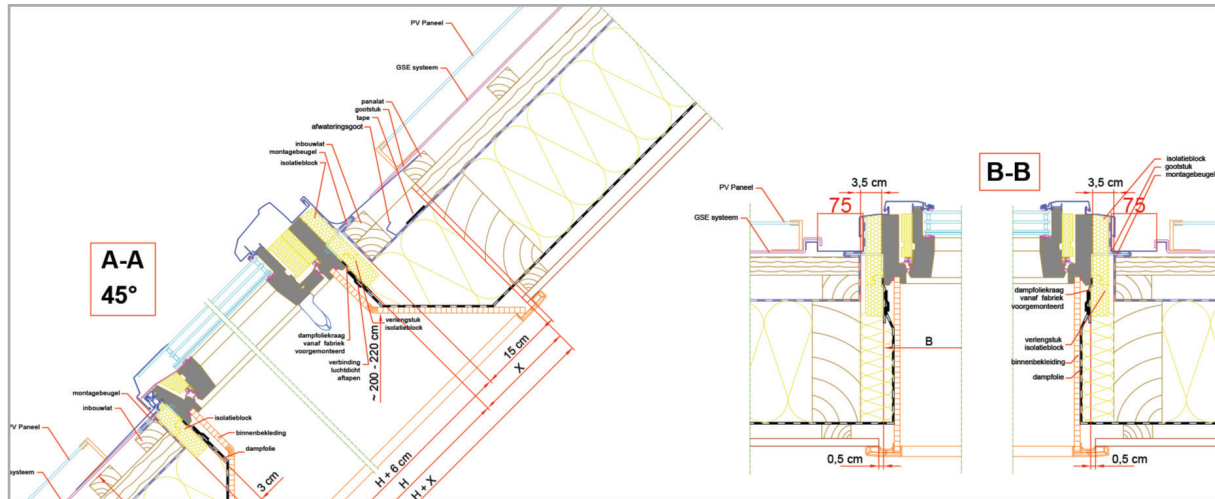

Advantages of Roto in combination with the GSE assembly system:

- + The ideal sustainable combination: lower energy bills and a healthy indoor climate
- + Modular construction
- + Safe and simple connection to Roto GSE flashings
- + 100% Water-tight system
- + Compatible with 95% of solar panels
- + Compatible sunblind and window decoration available
- + Free choice of roof window type and control mechanism
- + Suitable for passive houses, thanks to improved energy-efficiency

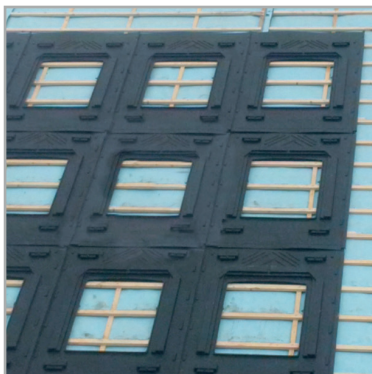

*Roto offers **flashings and pieces of connections for roof windows** in all RAL colors, so you can **customise your own roof!***

Integration of Roto roof window in GSE system

Roof window in 3 steps:

1. Choose the desired PV system

2. Choose the desired roof window system

3. Perfect integration of roof window and PV

Roto can supply the roof window exterior guards and the gutter elements in all RAL colours. A great way to personalise your new roof.

Safe, simple water-tight joint.
